

Figure 1

Figure 1 shows the geometry of the system.

The system is composed of two parts:

1. A central part, which is a circle.

2. Two outer parts, which are triangles.

The central part is a circle.

The two outer parts are triangles.

The central part is a circle.

The two outer parts are triangles.

The central part is a circle.

The two outer parts are triangles.

The central part is a circle.

The two outer parts are triangles.

The central part is a circle.

The two outer parts are triangles.

The central part is a circle.

The two outer parts are triangles.

The central part is a circle.

The two outer parts are triangles.

The central part is a circle.

The two outer parts are triangles.
